

Areas around the site that are not developed support fair quality Mesic Mixed Hardwood Forest dominated by tulip tree, with some hickories, red oak, and white oak. Common understory components include ironwood, flowering dogwood, sourwood, umbrella magnolia, black gum, and American beech. Herbs such as Christmas fern (*Polystichum acrostichoides*) and black cohosh (*Cimicifuga racemosa*) are common, as well as the non-native vine Japanese honeysuckle (*Lonicera japonica*).
